TITLE INDEX

Volume 58

1986

A

A close look at changes of BOD_5 in an RBC system (Lin, Schnepper, Evans) 757
A look at three decades, and an admonition (Monitor) 1016
A new era begins (Schwartz) (Presidential message) 867
A post conference surprise (Editorial) 1015
A rational method for sludge dewatering via freezing (Reed, Bouzoun, Medding) 911
A study of operational ultraviolet disinfection equipment at secondary plants (White, Jernigan, Venosa) 181
A tale of three giant sewerage systems (Barletta, Webber) (Feature) 871
Acclimation and biodegradation of chlorinated organic compounds in the presence of alternate substrates (Kim, Maier) 157
Accuracy and precision of plant scale and shop clean water oxygen transfer tests (Baillod, Paulson, McKeown, Campbell) 290
Acid precipitation (WPCF Issue Paper) 1030
Activated sludge control for seasonal nitrification (Hart, Defore, Chiesa) 358
Active mass in activated sludge analysis and design (Quirk, Eckenfelder) (Communication) 932
Adsorption of lead and zinc on blast furnace iron oxide solids (Mihelcic, Luthy) 242
Adsorption of organic pollutants on montmorillonite treated with amines (Wolfe, Demirel, Bauman) 68
Adsorption, desorption, and bioregeneration in an anaerobic, granular activated carbon reactor for the removal of phenol (Kim, Chian, Cross, Cheng) 35
Aeration and substrate utilization in a sparged packed-bed biofilm reactor (Lee, Stensel) 1066
Algal separation by the lime-seawater process (Ayoub, Koopman) 924
An untouchable problem? (Editorial) 97
Anaerobic digestion of solids captured during primary effluent filtration (Dean, Matsumoto, Weber, Tchobanoglous) 132
Anaerobic digestion: Effects on particle size and dewaterability (Lawler, Chung, Hwang, Hull) 1107
Anaerobic treatment of coal conversion wastewater constituents: biodegradability and toxicity (Blum, Hergenroeder, Parkin, Speece) 122
Anaerobic treatment of domestic wastewater (Switzenbaum, Grady) (Feature) 102
Anaerobic treatment of phenol by an expanded-bed reactor (Wang, Suidan, Rittman) 227
Asking the right question (Editorial) 1

B

Behind the scenes (Editorial) 865
Bench scale treatability of leachate from an abandoned phenolic waste site (Drinkwater, Zoltek, Delfino) 1057
Biological phosphorus removal: a technology evaluation (Tetreault, Benedict, Kaempfer, Barth) 823
Blast furnace recycle water quality and reactions of lead and zinc (Luthy, Sable, McMichael) 250

C

Comparative removal of toxic pollutants by six wastewater treatment processes (Hannah, Austern, Eralp, Wise) 27
Computer detection of the impact of hydraulic shocks on plant performance (Olsson, Stephenson, Chapman) 954
Computerized solution of velocity profiling technique for open channel calibration (Debevoise) (Communication) 804
Construction grants under Gramm-Rudman Hollings (Editorial) 173
Control of actinomycete scum on aeration basins and clarifiers (Sezgin, Karr) 972
Controlling toxicity: an integrated strategy (Monitor) 6

D

Declining lake sediment phosphorus release and oxygen deficit following wastewater diversion (Welch, Spyidakis, Shuster, Horner) 92
Design and performance of a groundwater treatment for toxic organics removal (McIntyre, Hatch, Gelman, Peschman) 41
Design model for the overland flow process (Witherow, Bledsoe) 381
Design of rapid small-scale adsorption tests for a constant diffusivity (Crittenden, Berrigan, Hand) 312
Design of trickling filter nitrification towers (Gullicks, Cleasby) 60
Designation of limited resource value waters in Minnesota (Peissig) (Communication) 805
Developing management guidelines for river nitrogenous oxygen demand (Cooper) 845
Development of biofilm, operating characteristics and operational control in the anaerobic rotating biological contractor process (Lanquidara, Blanc, O'Shaughnessy) 107
Disinfection for potable reuse (Rogers, Lauer) 193
Disinfection of low quality wastewaters by ultraviolet light irradiation (Zukovs, Kollar, Monteith, Ho, Ross) 199

E

Effect of biomass on oxygen transfer in RBC systems (Paolini) 306
Effects of feed pattern and dissolved oxygen on growth of filamentous bacteria (Nowak, Brown, Yee) 978
Effects of floc volume variations in activated sludge thickening characteristics (Knocke) 784
Effects of mean cell residence time and particle size distribution on activated sludge vacuum dewatering characteristics dewatering characteristics 1118
Effects of synthetic polyelectrolytes on selected aquatic organisms (Biesinger, Stokes) 207
Effects on flourides on survival and reproduction of *Daphnia magna* (Fieser, Wu, Sykora, Kostalos, Weyel) 82
Energy usage of rotating biological contractor facilities (Gilbert, Wheeler, MacGregor) 47
Environmental research and the dwindling dollar (Monitor) 812
Evaluation of biological sludge properties influencing volume reduction (Barber, Veenstra) 149
Evaluation of factors affecting the oxygen transfer from high-speed floating surface aerators (Poduska, Hager) 300
Evaluation of high density cross flow media for rehabilitating an existing trickling filter (Drury, Carmona, Delgadillo) 364
Evaluation of plastic media in trickling filters (Richards, Reinhart) 774
Evaluation of treatment plan performance: causes, frequency and duration of upsets (Berthouex, Fan) 368
Evolving concepts of subsurface contaminants transport (Keely, Piwoni, Wilson) (Feature) 349

F

Fate of naphthalene in a rotating disc biological contactor (Glaze, Peyton, Young, Lin) 792
Feasibility of constructing a waste-to-energy incinerator to generate electricity for a colocated wastewater treatment plant (Shaw, Norton, Middlebrooks) 267
Field evaluation of arsenic and selnium removal by iron coprecipitation (Merrill, Manzione, Peterson, Parker, Chow, Hobbs) 18
Final settler performance during transient loading (Chapman) (Discussion) 861
Financial statement 412
Flocculator-clarifier performance (Parker, Stenquist) 214
Flow measurement instrumentation (EPA Design Information Report) 1005
Full-scale studies of the trickling filter solids contact process (Matasci, Kaempfer, Heidman) 1043

G

Groundwater protection: Working without a statue (Savage) 340

H

Help wanted (Editorial) 723
How stringent should marine waivers from secondary treatment be? (Issue Paper) 1101
Hydraulic studies and cleaning evaluations of ultraviolet disinfection units (Kreft, Scheible, Venosa) 1129

I

Improved alkalimetric monitoring for anaerobic digestion of high-strength wastes (Ripley, Boyle, Converse) 406
Induced responses on algal growth and phosphate removal by three molecular weight DOM fractions from a secondary effluent (Langis) 1073
Induced responses (Langis, Couture) (Communication) 799
Inhibition kinetics of nitrification in continuous-flow reactors (Rozich, Castens) 220
Interactions of temperature, pH, and biomass on the nitrification process (Shammas) 52
Interview with Lawrence Jensen—Sustaining the momentum (Monitor) 98
Is clean water research keeping pace with national pollution control needs? (WPCF Issue Paper) 880

K

Kinetics and stoichiometry of SBA/denitrification with a primary sludge carbon source (Abufayed, Schroeder) 398

L

Lake resources at risk to acidic deposition in the Upper Midwest (Schnoor, Nikolaidis, Glass) 139
Leaching tests of heavy metals stabilized with Portland cement (Shively, Bishop, Gress, Brown) 234
Los Angeles: A new era begins (Monitor) 1084

M

Marine sediment core profiles of trace constituents offshore of a deep wastewater outfall (Stull, Baird, Heesen) 985
Maryland's phosphate ban—history and early results (Jones, Hubbard) (Feature) 816
Matters of opinion (Editorial) 809
Media design factors for fixed-bed filters (Song, Young) 115
Meeting the challenge of nonpoint source control (Feature) (ASIWPCA) 730
Metric equivocation (Editorial) 943
Microcomputers and water quality models: access for decision makers (Heidtke, Auer, Canale) 960
Modeling activated sludge nitrilotriacetic acid acclimation (Nieuwstad, van't Hof) 1000
Modeling and performance of the activated sludge-powdered activated carbon process in the presence of 4, 6 dinitro-o-cresol (Garcia-Orozco, Fuentes, Eckenfelder) 320
Monitoring and evaluating composting process performance (Finstein, Miller, Strom) 272
Multipurpose wastewater reuse (Shannon, Derrington, Varma) 1039
Municipal sludge composting technology evaluation (Benedict, Epstein, English) 279

N

New horizons—A strategy for change (Schwartz) (Presidential Message) 2
Nitrification in trickling filters (Parker, Richards) 896
Nutrient transformation in retention/detention ponds receiving highway runoff (Youself, Hvitved-Jacobsen, Wanielista, Tolbert) 838

O

Of rocks and hard places (Editorial) 261
Operation and maintenance requirements for small-flow treatment systems (Englehardt, Ward) 967
Operator training: the key to successful computer control (Feature) (Younkin, Johnson) 944
Organic contamination: Whistling past the graveyard (Weber) (Feature) 12
Overland flow treatment of wastewater at Florida State Prison (Overman, Wolfe) 903

P

PAC-activated sludge treatment of a steel mill coke-plant wastewater (Shieh, Chao, Yeh) 333
Pathogen and indicator organism destruction by the dual digestion system (Appleton, Leong, Venosa) 992
Performance of SBR/denitrification with a primary sludge carbon source (Abufayed, Schroeder) 387
Phenol growth kinetics of heterogeneous population in a two-stage continuous culture system (Colvin, Rozich) 326
Phosphate detergents—a closer look (Feature) (Booman, Sedlak) 1092
Phosphorus loads to the Chesapeake Bay: a perspective (Lung) 749
Pollution liability insurance: Creative response action (Monitor) 725
Prediction of nitrification in water hyacinth treatment systems (Weber, Tchobanoglous) 376
Pretreatment: Are we headed in the right direction? (Committee Viewpoint) 1105
Process control and management information processing at a municipal wastewater treatment plant (Williams, Burgarino, Fernandez) 949
Protection of wastewater lagoon interior slopes (EPA Design Information Report) 1010
Public health and engineering—The profession in perspective (Monitor) 262

R

Reclaimed water irrigation to eliminate summer discharge (Deis, Scherzinger, Thornton) 1034
Recommended metric (SI) practice for engineering drawings and maps (Committee Report) 741
Removal of particulate and dissolved organics in aerobic fixed fixed-film biological processes (Sarner) 165
Re-evaluation of launders in rectangular sedimentation basins (Kawamura, Lang) 1129

S

Single-sludge nitrogen removal: modeling and experimental results (Argamon, Brenner) 853

Survey of viral pollution in Besos River (Barcelona) (Bosch, Lucena, Girones, Jofre) 87

T

Technology evaluation of the dual digestion system (Appleton, Venosa) 764
The effects of advanced wastewater treatment on river water quality (Kennedy, Bell) 1138
The effects of non-ideal competition on multi-component adsorption equilibria (Yonge, Keinath) 77
The magnitude of improper waste discharges in an urban stormwater system (Schmidt, Spencer) 744
Treatment of thiosulfate-containing wastewater in activated sludge systems (Millano, Sorber) 917

U

Using the Literature Review (Feature) 417
Using the Literature Review (Saunders) (Feature) 415

V

Volatile organic chemical contamination of groundwater resources in the U.S. (Barbash, Roberts) (Feature) 343
Volatile organics in the wastewater and airspaces of three wastewater treatment plants (Dunovant, Clark, Hee, Hertzberg, Trapp) 886

W

Wastewater disinfection—Time for a change? (Feature) (Shertzer) 174
Wastewater reuse project produces impressive crop yields (Feature) (Willets, Lowe, Doty) 1026
Wastewater stabilization kinetics: a semicontinuous view (Wood) (Communication) 937
What you see is what we get (Editorial) 339

AUTHOR/SUBJECT INDEX

Volume 58

1986

A

Abufayed, A. A., denitrification in SRBs 387, 398
Acclimation
activated sludge to NTA 1000
to chlorinated organics 157
Acid rain
alliance formed 20a
lobby against HR 4567 698a
midwest lakes 139
WPCF issue paper 1030
Actinomycetes, scum control 972
Activated carbon
adsorption model 68
anaerobic 35
and activated sludge 320, 333
bioregeneration 35
expanded-bed biological reactor 227
groundwater remediation 41
phenol removal 35
small-scale adsorption tests 312
Activated sludge
acclimation to chlorinated organics 157
active mass prediction 932
dewatering characteristics 1118
filamentous bulking 978
nitrification kinetics 220
NTA acclimation 1000
phenol growth kinetics 326
phenolic waste treatment 1057
priority pollutant removal 27
scum control 972
seasonal nitrification 358
thickening characteristics 784
thiosulfate treatment 917
with activated carbon 320, 333
(Lit. Review) 490
Activated sludge process, hydraulic shocks 954
Active mass, prediction 932
Adsorption
metals on iron oxide solids 242
model 68, 312
organics on clay 68
Advanced wastewater treatment, effect on water quality 1138
Aeration
seasonal nitrification control 358
sparged packed-bed biofilm 1066
Aerators, maintenance and oxygen supply 300
Aerobic digestion, (Lit. Review) 501
Aerobic fixed-film processes, organics removal 165
Agricultural reuse, irrigation 1034, 1039
Agricultural wastes, (Lit. Review) 557
Air testing, volatile organics at wastewater treatment plants 886
Algae
effect of dissolved organics 1073
phosphorus removal 1073
polyelectrolyte toxicity 207
removal from oxidation pond, effluents 924
Alkalinity, anaerobic digestion 58, 406
NBOD in rivers 845
removal in trickling filters 60
Anaerobic digestion
alkalinity monitoring 406
particle size and dewatering 1107
primary effluent solids 132
Anaerobic processes
coal conversion wastewater 122
fixed-bed filter design 115
municipal wastewater treatment 102
phenol removal 227
RBC design and operation, (Lit. Review) 107, 504
Analysis, (Lit. Review) 427
Appleton, A.R.
sludge digestion 764
sludge pathogen destruction 992
Aquatic organisms
fluoride toxicity 82
polyelectrolyte toxicity 207
Argamon, Y., single-sludge nitrogen removal 853
Arsenic, iron coprecipitation 18
ASIWPCA, nonpoint source control survey, (Feature) 730, 1082
Auer, M. T., water quality modeling 960
Austern, B.M., priority pollutant removal 27
Automated analysis, (Lit. Review) 476
Automation, operator computer training 944
Ayoub, G.M., algal separation 924

B

Bacteria, indicators of viral pollution 87
Baillod, C. R., oxygen transfer tests 290
Baird, R. B., sediment contamination 985
Barbash, J., groundwater contamination 4343
Barber, J. B., sludge characteristics 149
Barletta, R. J., Los Angeles area wastewater treatment (Feature) 871
Barth, E. F., biological phosphorus removal 823
Batch processes, denitrification 387
Baumann, E.R., adsorption 68
Bell, J. M., water quality modeling 1138
Benedict, A. H.
biological phosphorus removal 823
sludge composting 279
Benthic respiration, water quality modeling 1138
Berrigan, J. K., activated carbon adsorption 312
Berthouex, P. M., treatment plant performance 368
Beisinger, K.E., polyelectrolyte toxicity 207
Bioassay, polyelectrolytes 207
Biodegradation
chlorinated organics 157
phenolic compounds 122
phenolic waste leachate 1057
Biofilm, sparged packed-bed 1066
Biofilm characteristics, anaerobic RBCs 107
Biological treatment
fate of naphthalene 792
phosphorus removal 823
Biomass, effect on oxygen transfer 306
Bioregeneration, activated carbon 35, 227

Bishop, P., heavy metal waste stabilization 234
Blanc, F. C., anaerobic RBCs 107
Blast furnace iron oxide solids, adsorption of lead and zinc 242
Blast furnace recycle, lead and zinc 250
Bledsoe, B. E., overland flow 381
Blum, D. J. W., coal conversion wastewater treatment 122
BOD removal
RBCs 757
trickling filter media 364, 774
Booman, K. A., phosphate detergents (Feature) 1092
Bosch, A., viral pollution 87
Bouzoun, J., sludge dewatering 911
Boyce, E., interview 262
Boyle, W. C., anaerobic digestion 406
Brenner, A., single-sludge nitrogen removal 853
Brown, G., filamentous bulking 978
Brown, T., heavy metal waste stabilization 234
Bulking sludge
characteristics of 149
effects of feed pattern and DO 978
Burgarino, A. E., computer management 949

C

Cadium
sludge limit established 699a
Campbell, H. J., Sr., oxygen transfer tests 290
Canale, R. P., water quality modeling 960
Carmona, J., III, trickling filter media 364
Castens, D. J., nitrification kinetics 220
Cement, stabilization of heavy metals 234
Chao, Y. M., coke plant wastewater treatment 333
Chapman, D., hydraulic shocks 954
Chemical clarification, priority pollutant removal 27
Chemical industry wastes (Lit. Review) 589
Chemical treatment, detergent phosphates (Feature) 1092
Cheng, S. S., activated carbon treatment
Chesapeake Bay, phosphorus loads 749
Chian, E. S. K., activated carbon treatment 35
Chiesa, S. C., seasonal nitrification 358
Chlorinated organics
activated sludge acclimation 157
biodegradation 157
Chlorination
combined sewer overflow 199
compared to ultraviolet 199
Chlorine dioxide, disinfection for potable reuse 193
Chow, W., trace metal removal 18
Chung, Y. J., anaerobic digestion 1107
Clarifier performance, model for behavior during transient loading 861
Clarifiers, flocculation 214
Clark, C. S., volatile organics 886
Clay, organics adsorption 68
Clean Water Act, stormwater permits 607a
Cleaning, UV disinfection units 1129
Cleasby, J. L., trickling filter design 60
Coal conversion wastewater, anaerobic treatment 22
Coal mine wastes and drainage (Lit. Review) 566
Coke plant wastewater, activated sludge treatment 333
Coliforms, indicators of pollution 87
Collection of wastewater, (Lit. Review) 479
Collins, M. A., activated sludge settling 861
Colvin, R. J., phenol growth kinetics 326
Combined sewer overflows
disinfection 199
(Lit. Review) 534
Compliance reporting, computerization 543a
Composting
process monitoring 272
technology evaluation 279
Computers
management information 949
modeling hydraulic shocks 954
operator training 944
process control 949
small-flow treatment costs 967
water quality modeling 960
Construction grants
phase-out funding 20a
reauthorization 74a
supplemental appropriation 418a
Contaminant transport, groundwater (Feature) 349
Continuous culture, phenol growth kinetics 326
Control, filamentous bulking 978
Converse, J. C., anaerobic digestion 406
Cooper, A. B., modeling river nitrogenous oxygen demand 845
Coprecipitation, arsenic and selenium 18
Costs
dual digestion of sludge 764
sludge composting 279
small-flow treatment O&M 967
Couture, P., phosphate removal 1073
Cresols, activated sludge-PAC process 320
Criteria, water quality-based for toxics, (Monitor) 6
Crittenden, J. C., activated carbon adsorption 312
Crosby, R. M., activated sludge settling 861
Cross, W. H., activated carbon treatment 35
Cyanide wastes, (Lit. Review) 586

D

Dairy wastes, (Lit. Review) 556
Daphnia magna, fluoride toxicity 82
Dean, S.R., anaerobic digestion 132
Debevoise, N. T., open channel flow calibration 804
Decomposition rate, measurement 272
Defore, R., seasonal nitrification 358
Degradation, nitrilotriacetic acid 1000
Deis, G. C., wastewater reuse 1034
Defino, J. J., phenolic waste treatability 1057
Delgadillo, A., trickling filter media 364
Demirel, T., adsorption 68
Denitrification, primary sludge as carbon source 387
Denitrification kinetics, SBR 387, 398
Derrington, B., wastewater reuse 1039
Designated uses, limited resource value waters 805
Design
activated sludge settlers 954
anaerobic fixed-bed filters 115
anaerobic RBCs 107
flow measurement 1005
lagoon interior slope protection 100
overland flow process 381
trickling filter nitrification 896
trickling filters 60
ultraviolet disinfection 181, 1129
water hyacinth treatment 376
Detention ponds, nutrient removal 838
Detergents, phosphate bans, (Feature) 1092
Dewatering
anaerobic sludge 1107
effect of particle size and sludge age 1118
freezing 911
sludge characteristics 149
Digestion
anaerobic and aerobic system 764
anaerobic 132, 1107
dual for pathogen reduction 992
dual system for sludge 764
Discharge limitations, compliance through reuse 1034
Discharges, illegal storm drain 744
Disinfection
chlorine versus ultraviolet 199
potable reuse 193
standards, (Feature) 174
ultraviolet 181
UV light 1129
(Lit. Review) 518
Dissolved oxygen
effects on bulking 978
nitrification 845
Drawings and maps, recommend metric practice 741
